Thank you for downloading LogMon. This zip archive contains the following files:

LogMon.exe - The LogMon executable

END-USER LICENSE AGREEMENT – The Legal Stuff

Migrate with LogMon.vbs – an example vbscript that uses LogMon to monitor an automated User Profile Wizard migration.

Migrate with LogMon.vbs is a standard migration script as generated by the User Profile Wizard Deployment Kit. The script has been modified to launch LogMon by adding the following lines:

```
'Startmonitor
DimstrLogMon
strLogFile="C:\Users\Public\Documents\migrate.log"
strLogMon="LogMon.exe"&chr(34)&strLogFile&chr(34)
objWshShell.Run("%comspec% /k " & strLogMon)
```

Change the strLogFile= line to point to your own log file.
